Office Action Summary

Receipt is acknowledged of IDS, Correction, Change of address, Declaration and amendment of (5/1/02).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 301-310, drawn to method of combating, classified in class 424, subclass 405.
- II. Claims 311-321, drawn to process of products, classified in class 426, subclass 54.

The inventions are distinct, each from the other because:

The method as claimed can be practiced with products made from materially different processes, such as organic synthesis.

Because the Groups have acquired a separate status in the art as shown by their different classification, and their recognized divergent subject matter, the search for any one group is not required for any other group. Furthermore because, a search and examination of the entire application would place an undue burden on the Examiner, the present restriction requirement is proper for examination purposes.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

A telephone call was made to Attorney William Breen, III on August 1, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Application/Control Number: 09/880,738
